Description

Remote control and follow mode, Safe and Fun

Your Personal Self Balancing Transporter

The Segway S-PLUS delivers enhanced speed and range, along with the ability to control the unit remotely and even have it follow you. This high-tech, two-wheel scooter is well built with a robust and durable base and frame which provides confidence while riding.

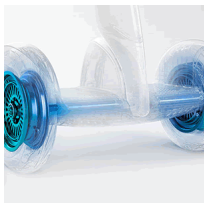

- **Sturdy & Powerful:** With the powerful dual motors of 400W, the Segway S-Plus can reach a max speed of 12.5 mph, travel up to 22 miles and accommodate a max load of 220 lbs after a single full charge. Ride your Segway S-Plus to enjoy the beautiful scenery
- **Safety & Comfortable:** Smart Battery Management System assures the battery safety and extends the battery life. Knee control bar allows for precise steering and easy lifting. The 11" pneumatic tires provide a comfortable and smoother ride on bumpy roads
- **Remote Control & Auto-Follow Mode:** Use the handle or the joystick on the multi-functional remote with intelligent chip to control the device. When you're not riding and need to have your hands free, turn on follow mode to have your S-Plus follow you
- **Intelligent App Management:** Download the Segway app for anti-theft function, speed limit and adjustment, vehicle self-diagnose, adjustable ambient lights, firmware upgrade, monitor battery status, vehicle remote control and more
- **Quality Assurance:** With premium technology, extended functionalities and sleek design, the Segway S-Plus is like having your own personal robot. One-year or 180-day warranty for different parts, please refer to warranty in product details below

Easy to Learn, Safe to Ride
The Rider Tutorial from the Segway-Ninebot App provides step-by-step training, which is easy for everyone. For your safety, the Ninebot S Plus will limit the max. speed to 4.3 mph until you complete the Rider Tutorial. For first 0.6 miles after completing the Rider Tutorial, the max speed will be limited to 6.2 mph, after which you can disable the speed limiter via the App and reach a maximum speed of 10 mph.

Lightweight & Portable
By using light but durable aircraft-grade magnesium alloy frame, the Ninebot S Plus is compact and only weighs 36 lbs with a max. payload of 220 lbs. Thanks to the knee control bar, it can be easily lifted up and stored in a car trunk. The knee control bar can also be quickly detached to make it fit into small spaces in a pinch.

Powerful Motors & Intelligent BMS
Thanks to the powerful dual 400W motors, the Ninebot S Plus can easily reach the max. speed of 12.5 mph. A single fully charged battery can run up to 22 miles, climbing a max. slope of 15%. Smart Battery Management System reports real time status of voltage, current, temperature and usage as well as queries and tracking of the battery's status and potential faults, which substantially improves ride safety and comfort.

Intelligent APP Management
Anti-theft function, speed limit and adjustment, vehicle self-diagnose, adjustable ambient lights, firmware upgrade, vehicle remote control and more.
