Description

This gear shift cable is commonly (though not exclusively) found on varieties of manual shift ATVs, scooters, go karts and buggies within the 50cc to 300cc range. Very commonly implemented as the go-kart shift cables for many models produced by factories such as Buyang, Liangzi, Kangdi (aka Kandi) etc. Popularly known as the shift cable for Kandi 50cc (49FM5) go karts.
